PROFILE

Detail-oriented Data Science & Data Analytics student at Arkansas State University and two-time Dean's List honoree, also studying civil engineering. I build end-to-end projects, from machine-learning models in Python to full-stack web apps deployed live, and hold IBM data science certificates plus 10 DataCamp courses in Python, SQL and Power BI. I bring hands-on experience in data organization, customer service and teamwork, and I'm seeking data analyst or engineering internships.

EDUCATION

Arkansas State University | Jonesboro, AR — *Expected 2027*

Bachelor of Science in Data Science and Data Analytics; also studying Civil Engineering

- **Dean's List:** Fall 2025 and Spring 2026

Trinity International College | Kathmandu, Nepal — *2022*

High School (+2 in Science) • GPA 3.32 / 4.0

Nepal Mega School | Kathmandu, Nepal — *2020*

Secondary Education Examination (SEE) • GPA 3.70 / 4.0

CERTIFICATIONS

- **What is Data Science?** — IBM (Coursera) — *Jun 2026*
- **Tools for Data Science** — IBM (Coursera) — *Jun 2026*
- **Data Science Methodology** — IBM (Coursera) — *Jun 2026*
- **Tools for Data Science V2** — Coursera (Credly badge) — *Jun 2026*
- **Data Science Orientation** — Coursera (Credly badge) — *Jun 2026*
- **Claude 101** — Anthropic — *Jun 2026*
- **DataCamp (10 courses):** Introduction to Python, Intermediate Python, Introduction to NumPy, Reshaping Data with pandas, Exploratory Data Analysis in Python, Introduction to Data Visualization with Matplotlib, Introduction to SQL, Intermediate SQL, Data Visualization in Power BI, Data Warehousing Concepts

PROJECTS

LearnCivilWithMe | Next.js, PostgreSQL (Neon), Vercel

learncivilwithme.vercel.app

- Built and deployed a free self-study platform that guides learners to a US civil engineering license: 9 phases and 94 tasks with curated free resources.
- Wrote 145 FE-style practice questions and engineering calculators (beams, sections, Manning's equation, concrete), with optional login and cloud-synced progress.

EquipGuard: Predictive Maintenance | Python, scikit-learn, FastAPI, Next.js

- Simulated run-to-failure sensor data for a fleet of 100 pumps and trained gradient boosting models to predict remaining useful life (MAE ≈ 16.6 cycles) and near-term failure risk (ROC-AUC ≈ 0.93).
- Used unit-level train/test splits to prevent data leakage, and served live predictions through a FastAPI backend and an interactive dashboard.

Traffic Accident Severity Prediction | Python, pandas, scikit-learn, seaborn

- Modeled accident severity from weather, time-of-day and road features in the US Accidents dataset; compared a logistic regression baseline with a random forest using weighted F1 and repeated stratified splits.

TBN Store: E-commerce Site | Next.js, Prisma, PostgreSQL, Auth.js

tbnstore.vercel.app

- Built a bilingual (English/Nepali) storefront for a kids' clothing brand with search, wishlists, reviews, coupons, stock alerts, a booking flow and an admin dashboard.

Service Marketplace | FastAPI, PostgreSQL, React, Capacitor

- Built a platform connecting customers with skilled workers: customer, worker and admin roles, real-time WebSocket chat, Stripe payments, maps and dispute moderation.

VideoForge: Automated Video Pipeline | Python, MoviePy, Claude, Next.js

- Automated a YouTube workflow from idea to AI-written script, voice-over with word-synced captions and an auto-edited MP4, replacing hours of manual editing.

PyQuest: Learn Python in the Browser | Pyodide, Next.js

- Created 83 bite-sized Python lessons that run real Python in the browser with automatic answer checking.

Also built

- FinTrack (finance and tasks dashboard, Next.js), Expense Tracker (Next.js, Express, Prisma, Clerk) and a personal portfolio site with a real-time 3D truss model (JavaScript, Canvas).

Why It Broke | YouTube channel, creator

- Research, script and produce videos explaining engineering failures, starting with the Tacoma Narrows Bridge collapse.

WORK EXPERIENCE

Sodexo Food Services | Jonesboro, AR *May 2024 – Nov 2025*

Food Service Worker

- Delivered efficient food service as part of a team-oriented operation.
- Maintained cleanliness, organization and food-quality standards.
- Assisted customers and supported food preparation.

Chartered Accountants' Office (CA Firm) | Kathmandu, Nepal *Mar 2023 – Nov 2023*

Data Organizer & Front Desk Assistant

- Managed and organized client data and financial records, keeping documents accurate.
- Handled client inquiries and scheduling.
- Supported day-to-day administrative operations.

SKILLS

Data & Programming: Python (pandas, NumPy, Matplotlib, scikit-learn), SQL, JavaScript / TypeScript, HTML / CSS

Tools: Power BI, Microsoft Excel, Word and PowerPoint, Git, FastAPI, Next.js / React, Vercel

Data Concepts: Exploratory data analysis, data visualization, data warehousing, machine learning basics

AI: Claude, AI-assisted automation and content workflows

Engineering: Statics fundamentals, FE exam preparation

Professional: Data entry and organization, communication, teamwork, time management, problem solving

LANGUAGES & INTERESTS

Languages: English (Fluent), Nepali (Native), Hindi (Conversational)

Interests: Data analytics, technology trends, teamwork, problem solving and continuous learning
